

An introduction to Teapot Racing

By Splendid Obstacles

Created by Simone Montgomery, Teapot Racing originated in New Zealand in 2014 at the Steampunk NZ festival in Oamaru.

Teapot Racing is a race where specially modified, battery powered, remote control Teapot vehicles maneuver around a course of obstacles in a timed event.

Teapot Racers will be crated from a battery powered, remote controlled vehicle of your choice. With a teapot mounted on it, as you see fit. Only the outside and chassis of the vehicle can be changed. The internals must remain unaltered. Racers must not exceed 11 7/8 inches (30 cm) wide, by 11 7/8 inches (30 cm) tall, and 15 3/4 inches (40 cm) long.

Get that racer ready and we'll see you May 3rd at the Festival!
